\* These packages are the typical packages picked by groups, for a more custom schedule to fit your needs, please contact the Summer Camp Director.

\*\* It is our preference to receive payment from groups on the day of their trip. If alternate payment arrangements need to be made, please contact the office.

## Programming Options

Please mark the programming options that you would like for your class. A typical day trip will be able to have 3 or 4 programs offered. For additional information, please contact the Summer Camp Director.

**Instincts for Survival** – Students will learn about the natural balance of nature and the challenges that all animals face. Each child plays the role of a specific animal. Participants will learn about the food pyramid and the impact then disease, elements and humans can have on an animal’s life.

**Archery** – Safety is our number one priority at our Archery Range. Students will learn the parts of a bow and arrow, how to properly load and shoot the arrow. Students will then take turns 4 at a time, testing their abilities on the range.

**Teamwork and Teampay** – Lambton Centre has a number of unique group challenges that will require your students to work together to solve a problem. Students will be encouraged by the camp staff to think about how they are communicating and how to involve all members of their group in the problem solving. A short debriefing after they have solved or attempted to solve the problem will allow them to see that sometimes it’s the group process that’s important, not success or failure at solving the challenge.

**Low Ropes Course** – Lambton Centre has 9 cables and rope elements in our low ropes course. Low rope elements are 6-8 inches off the ground and generally focus on the group. A low ropes session is a natural progression from the group challenges.

**Nature Discovery** – Lambton Centre is a diverse setting with everything from a ravine to a woodlot to tree plantations to a fen wetland on our lakefront. Your students will learn about one of these areas.

**Geo-Caching** – A high-tech treasure hunt. The students will be armed with a hand-held GPS unite and a site – map of Lambton Centre. They will then receive co-ordinates to a cache and set off in search of their treasure.

**Wild and Wacky Water Games** – Time to get silly! Cool off by playing “Splish Splish Spash”, “Tank”, “Slipball” or one of many more games. Bring your bathing suit and towel ... the wetter the better.

**Craft of the Day** – Cutting, Pasting, Embroidering, Sculpting ... you name it... you can do it at our Creation Station! Teachers will preselect from a list of age appropriate craft options and let the creativity run wild.

**Mountain Biking** – (groups under 30) – Bikes will be selected for students based on size. Students will receive instruction on how to ride and proper shifting of gears before heading out for a ride on our trails. With over 5km of trails, there’s a trail option from beginner to expert. Due to the size of our bikes, this activity is limited to Grade 5 and higher.

**Links to Leadership Program** – Designed for Grades 7/8 and High School Students this program incorporates full use of the low ropes course and many active initiative challenges to inspire strategizing delegation, managed risk taking and group organization.

**Other programming options may be available. Campfires and Wide Games are whole group activities that can be easily worked into your schedule. We would love to hear what your students are currently learning in school so we may plan games and activities to incorporate that. Please contact the Summer Camp Director for more options.**
